WORK EXPERIENCE

NVIDIA, Software Engineer Intern | *Santa Clara, CA* *Jan 2026 – Jul 2026*

Python, TypeScript, FastAPI, LangGraph, React, Next.js, SQL, Redis, Docker, REST APIs, OAuth/SSO, LLMs, Pandas, ServiceNow

- Built a full-stack workspace with SSO for IT support staff that unifies fragmented tools into one screen, including an AI resolution feature that searches internal documentation and generates cited, step-by-step solutions (**~83% accuracy** on high-confidence cases); cut resolution time by **80%** and saved **~27 hours/week**.
- Architected a full-stack, multi-agent analytics pipeline that measures whether IT support requests are genuinely resolved by AI before a ticket is even filed, replacing a ~6-hour manual monthly analysis with **~5-15 minute** on-demand report.
- Ran large-scale ticket data analyses (**30,000+ tickets per analysis**) that reshaped support routing and surfaced ground-truth data for multiple AI initiatives. Built automated reporting tools that turn raw ticket data into digestible, shareable trends.
- Mapped the procurement workflow end-to-end, catching a design flaw that caused **21%** of specialized hardware requests to be cancelled and resubmitted, and drove the fix through testing and validation.
- Held weekly office hours mentoring interns, led planning & cross-functional meetings, owned multiple projects end-to-end.

Google Cloud, Agentic AI Intern | *Sunnyvale, CA* *Jul 2025 – Aug 2025*

Google Agent Development Kit, Google Cloud Functions, Python, JavaScript, Node.js

- Developed a multi-agent, microservices-based solution built with Google Agent Development Kit to automate security scans on Google Cloud projects, incorporating a natural language Q&A interface to interpret & query scan results.
- Refactored a legacy security repository and deployed on Google Cloud Functions, integrating with the multi-agent system to **improve output readability** and **simplify execution of scans** across ~25 GCP services.
- Streamlined workflow and reduced manual security analysis for Technical Account Managers by **over 90%**.

EDUCATION

University of California, Irvine | *Irvine, CA* *Sep 2026 – Expected Jun 2028*

Computer Science, B.S.

Year Up United Fellow | Hybrid, *San Jose, CA* *Aug 2025 – Jan 2026*

Software & App Development

- An intensive, year-long career development program focused on professional skills, technical training, and corporate internship experience at one of 250+ partners. Completed coursework in Application Development, Computer Architecture, Database Fundamentals, Software Testing, and Software Engineering.

De Anza College | *Cupertino, CA* *Sep 2023 – Jun 2026*

Computer Science, AS-T (Dean's List, 4.0 GPA)

- Relevant Coursework: Data Abstraction & Structures, Java, Python, SQL, Discrete, Differential Equations, Linear Algebra

LEADERSHIP EXPERIENCE

President | Women in Computer Science Club | *De Anza College* *Aug 2025 – Jun 2026*

- Lead officers and manage operations and budget, serving as the primary point of contact for women-in-tech initiatives.
- Spearheaded campus tour and Q&A panel at Google Cloud, providing first-hand exposure to Google life & career paths. Organized women's career panel connecting students with industry professionals across software & hardware engineering.

Creative Director | Game Development Club | *De Anza College* *Aug 2025 – Jun 2026*

- Direct creative vision and branding, designing all promotional materials to enhance engagement and presence.
- Facilitated workshops and a Game Jam, drawing 300+ participants and 70+ submissions across multiple communities.

CERTIFICATES

Cloud Digital Leader, *Google Cloud*. July 2025 – July 2028.

Professional SCRUM Master I, *Scrum.org*. January 2026.

PROJECTS

Before I Go | De Anza Spring 2025 Game Jam

- Led a 5-person team to build a 2D-pixel visual novel with branching dialogue, a dynamic point system, and multiple endings in a one-week sprint. Won **1st place** out of **40+ teams** and **140+ participants**.

SKILLS

- **Programming Languages:** Python, Java, TypeScript, JavaScript, HTML, CSS, SQL
- **AI/ML:** Claude, Cursor, Codex, Google ADK, RAG, LLM-as-judge, prompt engineering
- **Frameworks/Libraries:** React.js, Next.js, Node.js, FastAPI, LangGraph, Pandas, SpringBoot
- **Platforms/Infrastructure:** Git/GitHub, Docker, Redis, REST APIs, OAuth/SSO, Google Cloud Platform, Google Colab
- **Spoken Languages:** English (Bilingual Proficiency), Vietnamese (Native)
- **Design**: Figma, Adobe Illustrator, Procreate, Canva, UI/UX
- **Other:** Project Management, Agile/SCRUM
